

Finding Product Prices

One of the most frequently asked questions SegenSolar gets is “what is the price of...?”

SegenSolar’s exclusive online portal shows pricing of all products in its portfolio (including or excluding your discount), as well as real time stock availability. The portal has a number of ways in which you can view product pricing, as shown by one of the processes below.

List Process

- Log onto the SegenSolar Portal
- Go to the **‘Product’** tab on the top navigation bar.
- Click **‘All Photovoltaic’**
- Click on the relevant Product Type or Manufacturer Logo
- All product prices will then be listed*. You can see more about that product by clicking on it, where it will show you the price and any special deals available.

Search Process

- Log onto the SegenSolar Portal
- Go to the **‘Search’** bar at the very top of the page.
- Enter a quote/order code, shipment number, product part number, description or manufacturer and press search to find all matching records. (Please be aware, that although this is an intelligent function, if you key in an incorrect number or not enough information, the search may not work)
- Click on the record you wish to see and the products page will appear.*

Other Options

From the products menu, you can also access

- **PV Package Offers** - SegenSolar also supply packs, packages and systems, to save you time and money. Here you can find them all, from new build applications right through to commercial solutions.
- **PV Storage Products** - Some products are available in bulk packs for a significant cost saving. This page gives you an overview of all these products.

*Prices shown are exclusive of VAT.
