

Application Note - Updating firmware on Pylontech batteries

Updating firmware on Pylontech batteries

The following is required to successfully update the battery firmware:

- New BatteryView for Pylontech battery. Can be found here.
- Firmware for battery. Can be found here.
- RS232 to USB cable Kit. Can be purchased here.
 - » For US2000/US3000/Phantom-S/UP2500, the RS232 cable type is RJ11 DB9 USB
 - » For Force L1/L2, the RS232 cable type is RJ45 DB9 USB

Once you have all the components listed above, the following steps will guide you on how to upgrade firmware on your battery

1. Using the RS232 to USB cable kit, plug the USB side into your laptop or computer and the RJ45/RJ11 side into the "console" port on the battery (indicated in blue below). Switch on the battery using the power switch.

2. Open the BatteryView program. Do not unzip the program from the .zip folder. Click on BatteryView to open the program.

diretter Nodere herret Dere freiset								
						344	(and last	1

 Ensure that the cable is detected by your laptop. This can be verified by going to the following location on your laptop: Control panel > Device manager > and expand the Ports (COM & LPT). It should look like below. Please note that your device might have a different COM number, it will be COMX (Where X is the number).

- 6. Click Browse to choose the firmware.
- For upgrade US2000B/US3000A/Force-L series product:

Please select the correct .bin file for the upgrade, by any version of Batteryview.

• For upgrade US2000C/US3000C/UP5000:

If the 8th and 9th of the product Serial Number is not 'E2' or 'C3', it can still select the correct .bin file for the upgrade, by any version of Batteryview.

If the 8th and 9th of the product Serial Number is 'E2' or 'C3', please select the correct .zip file for the upgrade and require using Batteryview V3.0.28 or higher.

*It's suggested to always use the .zip file and Batteryview V3.0.28 for any US2000C/US3000C/UP5000 upgrade to avoid wrong upgrade caused PCBA damage.
