Our plant is certified in accordance with:

TÜV Rheinland CERT:
ISO 9001:2008
ISO 14001:2004
ISO 50001:2011

Manufacturer qualification in accordance with:
DIN 18800-7:2008-11 class E

EG certification in accordance with:
DIN EN 1090-2/3 EXC3

DIN EN ISO 3834-2:2006
Comprehensive quality requirements
regarding welding operations

Manufacturer qualification in accordance with:
DIN 2303 Q2 BK1

DIN EN 15085-2
Certification level CL1

Manufacturer qualification in accordance with:
DIN V 4113-3 class C

TC KLEBEN Adhesive bonding specialists
in accordance with DIN 6701-2, class A1

Many systems also have official technical approval.

Accreditations and certification can be referenced on the internet at:
<http://www.schletter.de/EN/company/qm-certificates.html>

Mounting plan

Overview - Roof hooks

- all roof hooks are of quality steel
- adjustable hooks are fully pre-assembled

Wood screws, hexagon nuts (M10x25 mm) and flange nuts must be ordered separately!

Also available in black on request!

Roof hooks for minimal snow- and normal wind loads

- VA-quality
- Welded
- symmetric bar arrangement

100002-000 Roof hook Eco G

	a	b	c	d	e	f	g	h
mm	45	110	132	60	150	30	5	5

100003-000 Roof hook Eco V

	a	b	c	d	e	f	g	h
mm	45	105	117-147	60	150	30	5	5

Roof hooks for higher snow- and wind loads

- VA-quality
- Welded
- symmetric bar arrangement
- Various sizes available for improved rear airing.

100004-000 Roof hook Eco S 135 (Normal height 135 mm)

	a	b	c	d	e	f	g	h
mm	45	110	135	60	150	35	5	6

100004-001 Roof hook Eco S 135 KlickTop

100007-000 Roof hook Eco S 165 (Custom height 165 mm)

	a	b	c	d	e	f	g	h
mm	45	110	165	60	150	35	5	6

KlickTop

100008-000 Roof hook Eco S 195 (Custom height 195 mm)

	a	b	c	d	e	f	g	h
mm	45	110	195	60	150	35	5	6

100009-000 Roof hook Eco SV (extra stable, adjustable)

	a	b	c	d	e	f	g	h
mm	45	110	120-150	60	150	35	5	6

100009-001 Roof hook Eco SV KlickTop

Special design of the roof hook Eco S 135

100004-002 Roof hook Eco S 135 right

Bar arrangement right

100006-000 Roof hook Eco S 135 35mm

For low battens a = 35mm

100005-000 Roof hook Eco S 135 Bar 130

For large tile formats b = 130mm

Roof hook for particularly heavy snow loads

- VA-quality
- Welded
- symmetric bar arrangement

KlickTop

100010-000 Roof hook VaMax

	a	b	c	d	e	f	g	h
mm	45	120	145	80	180	35	6	8

100010-001 Roof hook VaMax KlickTop**100011-000** Roof hook VaMax (adjustable)

100011-001 Roof hook VaMax KlickTop (adjustable)

KlickTop

Roof hooks

Fastening elements

Roof hook Universal

- VA-quality
- Variable bar arrangement
- Adjustable at the front and rear
- Middle bar can be set in three different positions

100001-000 Roof hook Universal (Frankfurter Pantile or interlocking tile)

	a	b	c	d	e	f	g	h
mm	37-47	115	78-125	75	150	30	5	6

100001-001 Roof hook Universal KlickTop

Roof hooks Rapid²⁺

- VA-quality
- Welded
- Symmetric bar arrangement
- Pre-assembled

101001-000 Roof hook Rapid²⁺ 45

	a	b	c	d	e	f	g	h	i
mm	45	110	118	60	150	35	5	6	30

Comparable to: Eco S 100004-000, 100004-001, 100009-000

101001-001 Roof hook Rapid²⁺ 45V

	a	b	c	d	e	f	g	h	i
mm	45	110	125	60	150	35	5	6	30

As for 101001-000, but for vertical rail mounting

Comparable to: Eco S 100004-000, 100004-001, 100009-000

101002-000 Roof hook Rapid²⁺ 35

	a	b	c	d	e	f	g	h	i
mm	35	110	108	60	150	35	5	6	30

As with 101001-000, but 35 mm / 1.38 inch bracket height for low battens

Comparable to: Eco S 100006-000

101003-000 Roof hook Rapid²⁺ 55

	a	b	c	d	e	f	g	h	i
mm	55	110	116	60	150	35	5	6	30

As for 101001-000, but 55 mm / 2.17 inch bracket height for high battens or large tile formats

**101004-000** Roof hook Rapid²⁺ Universal

	a	b	c	d	e	f	g	h	i
mm	40-54	110	116	60	150	35	5	6	30

Universally adjustable, for vertical rail mounting
Comparable to: Universal 100001-000

**101005-000** Roof hook Rapid²⁺ Max

	a	b	c	d	e	f	g	h	i
mm	45	120	125	80	180	35	6	8	30

As for 101001-000, but with 35x8 mm /1.38x0.31 inch bar height for heavy snow loads
Comparable to: VaMax 100010-000, 100010-001, 100011-000, 100011-001

**101005-001** Roof hook Rapid²⁺ Max 150

	a	b	c	d	e	f	g	h	i
mm	43	150	125	80	180	35	6	8	30

As for 101005-000, but with extended bar (size b) for large tile formats
Comparable to: VaMax 100010-000, 100010-001, 100011-000, 100011-001

**101005-003** Roof hook Rapid²⁺ Max 35

	a	b	c	d	e	f	g	h	i
mm	35	120	115	80	180	35	6	8	30

As for 101005-000 but for low battens (Dimension a)

**101006-000** Roof hook Rapid²⁺ MaxV

	a	b	c	d	e	f	g	h	i
mm	45	120	125	80	180	35	6	8	30

As for 101005-000, but for vertical rail mounting
Comparable to: VaMax 100010-000, 100010-001, 100011-000, 100011-001

Roof hooks Rapid 2L

Roof hook kit for system roofs made up of insulating roof elements

101008-000 Roof hook Rapid 2L

	a	b	c	d	e	f	g	h	i
mm	20	127	74	88	35	35	6	6	30

101008-001 Roof hook Rapid 2L kit (incl. board and bolts)

Roof hooks

Fastening elements

Alu-Tile substitute tile of aluminium

Replaces a complete roof tile. Particularly suited to areas with high snow loads, incl. roof hooks with Rapid top piece.

¹ Additional measures: The tiles must be modified a bit! Please read our detailed product information. Price adjusted!

SlatePlan high-grade steel-shingle substitute

SlatePlan can be used on shingle roofing, e.g. of bitumen, fibre, cement or slate for connecting hanger bolt systems. Accessories: - see Corrugated Roof Fastening

109017-000 SlatePlan with seal 270x200x0.5 mm

109017-001 SlatePlan with seal 370x200x0.5 mm

109017-002 SlatePlan with seal 580x200x0.5 mm

Roof hook plain tile

- VA-quality

Please ensure that the hook design is suitable for the respective roof material.

103001-001 Roof hook Biberschwanz (basic)

	a	b	c	d	e	f	g	h
mm	45	255	125	60	30	30	5	5

103001-002 Roof hook Biberschwanz Universal (adjustable)

	a	b	c	d	e	f	g	h
mm	40	240	107-137	75	150	30	5	6

103011-000 Biberschwanz-fastening kit galv.. (basic)

	a	b	c	d	e	f	g	h
mm	32	255	125	60	30	30	5	5

Biberschwanz substitute tile, galvanized with integrated high-grade steel hook

103012-000 Biberschwanz-fastening kit Copper (basic)

Biberschwanz (plain tile) copper substitute plate with integrated VA-hook

103013-000 Biberschwanz-fastening kit stainless steel (universal)

	a	b	c	d	e	f	g	h
mm	32	260	130	45	30	30	5	5

Biberschwanz substitute tile, galvanized with integrated VA-hook

103011-001 Biberschwanz-fastening Univ. galv. (Universal)

	a	b	c	d	e	f	g	h
mm	35	245	110	71	140	30	5	5

Biberschwanz substitute tile, **galvanized** with integrated VA-hooks and additional fastening plate (adjustable at the sides). The optimum fastening method!

103012-001 Biberschwanz Biberschwanz fastening kit, Copper (Universal)

Biberschwanz substitute tile, copper with integrated VA hooks and additional fastening plate (adjustable at the sides).

Roof hooks

Fastening elements

Special roof hooks Slate/Prefa

- VA-quality
- No plate

An optimal mounting design for slate roofs is dependent upon the roof pitch!

102001-000 Roof hook Slate Prefa (basic)

	Length	Height	Breadth	Thickness
mm	235	75	30	5

102001-001 Roof hook Slate Prefa V (Vario)

	Length	Height	Breadth	Thickness
mm	235	60-90	30	5

Roof hook Thermodach

- Specially customized for application on thermal (Thermodach) roofs
- Fastening holes. 7mm / 0.28inches

109013-000 Roof hook Thermodach

	Length	Height	Breadth	Thickness
mm	235	75	35	6

Roof hook special design Bitumen

- Particularly flat hooks
- Designed particularly for fastening between bitumen tiles

109001-000 Roof hook Bitumen

	Length	Height	Breadth	Thickness
mm	255	75	40	4

Roof hook special design Tegalit

- No fastening plate
- For flat Tegalit tiles

109003-000 Roof hook Tegalit

	a	b	c	d	e	f	g	h
mm	52	180	132	60	30	30	5	5

Roof hook PP

- For purlin roofs with pan-tile roofing

Given the distribution of purlins, the hooks must generally be combined with a cross rail system.

109004-000 Roof hook system PP Purlin Pan

	a	b	c	d	e	f	g	h
mm	50	110	135	200	50	35	5	6

Roof hook Mönch-Nonne

- For special tile designs - Mönch / Nonne
- Particularly in South European countries.

109005-000 Roof hook Mönch Nonne - purlin (adjustable)

	a	b	c	d	e	f	g	h
mm	100-130	110	185-215	200	50	35	5	6

109005-001 Roof hook Mönch Nonne - rafter (adjustable)

	a	b	c	d	e	f	g	h
mm	100-130	110	185-215	60	150	35	5	6

Configurable for rafters or concrete

Roof hooks

Fastening elements

Roof hook accessories

109006-002 Shim 2mm DN 8

109006-005 Shim 5 mm DN 8

Distance piece for roof hook mounting (to be applied in pairs)

109007-002 Shim 2mm DN 10 Aluminium

109007-005 Shim 5 mm DN 10 Aluminium

109007-012 Shim 2mm DN 10 PA plastic

109007-015 Shim 5 mm DN 10 PA plastic

Compensating plate for connector M10 (consider screw length, if necessary!)

973000-017 Spacer plate 2 mm EcoG / EcoS / Rapid Standard

973000-018 Spacer plate 5 mm EcoG / EcoS / Rapid Standard

973000-019 Spacer plate 2 mm VaMax / Rapid Max

973000-020 Spacer plate 5 mm VaMax / Rapid Max

Distance piece for roof hook mounting

973000-221 Roof hook sealing tape grey TP600 10m

Application example

109008-000 KlickTop-Roof hook attachment

Designed particularly for special roof hooks which are not available as KlickTop.

Not appropriate for bitumen roof hooks!

Application example

109009-002 Plastic distance tube, custom cut

- For on-rafter insulation
- Applicable as a distance piece for on-rafter insulations in combination with extra long bolts;
- Plastic design prevents cold bridges!
- Please specify desired length in the order
- Bolts to be ordered separately!
- Please take into account the reduced permissible load per hook!

109010-000 Additional angle bracket Iso07

- for roof hook fastening - System Iso07

Application example

109014-000 ECO90-Angle bracket kit

- for roof hooks

Enables roof-hook mounting on structures with glulam girders. Incl. bolts and nuts for fastening ECO90 angle brackets to the roof hooks.

Compatible with all Schletter roof hooks, except:

100001-000 Roof hook Universal

100001-001 Roof hook Universal KlickTop

101004-000 Roof hook Rapid2+ Universal

Area of application

Fastening of solar and photovoltaic plants to the substructure of tiled roofs.

Technical data

Material Roof hooks and bolts: Stainless steel 1.4301
Distance pieces, compensating plates, KlickTop and Rapid profile clamping, Aluminium; sheet metal parts: Stainless steel 1.4301

Statik Structural analysis in accordance with current national standards (in Germany DIN1055 and EC1). Structural appendix for dimensioning the number of required fastening points, based on structural analysis.
Please ensure you observe the structural analysis information for each case. Verification for adhesive forces of a roof to the substructure is not included in any of the general structural analysis appendices!

System prices can be obtained quickly and easily with our Autokalkulator!

Assembly diagram

Corrugated roof fastening overview

For corrugated eternit or trapezoidal sheet metal roofs, so-called corrugated roof fastening kits are used, comprising a special hanger bolt with EPDM-sealing and a mounting plate.

- 943810-160** Loose hanger bolts without nuts, M10x160 mm
- 943810-200** Loose hanger bolts without nuts, M10x160 mm
- 943812-200** Loose hanger bolts without nuts, M12x200 mm
- 943812-250** Loose hanger bolts without nuts, M12x250 mm
- 943812-300** Loose hanger bolts without nuts, M12x300 mm
- 943812-350** Loose hanger bolts without nuts, M12x350 mm
- 943812-400** Loose hanger bolts without nuts, M12x400 mm

- 110010-200** Hanger bolt kit 10x200 mounted M10x200 mm
- 110012-200** Hanger bolt kit 12x200 mounted M12x200 mm
- 110012-300** Hanger bolt kit 12x300 mounted M12x300 mm
- 110012-350** Hanger bolt kit 12x350 mounted M12x350 mm
- 110012-400** Hanger bolt kit 12x400 mounted M12x400 mm

Pre-assembled hanger bolt kit with vulcanized EPDM-seal (UV-resistant) and 3 flange nuts in V4A, assembled

- 111110-200** Fastening kit for corrugated roofs 10x200 KlickTop M10x200 mm
- 111112-200** Fastening kit for corrugated roofs 12x200 KlickTop M12x200 mm
- 111112-300** Fastening kit for corrugated roofs 12x300 KlickTop M12x300 mm

KlickTop fastening kit for corrugated roofs incl. KlickTop kit, hanger bolt with vulcanized EPDM-seal (UV-resistant) and 3 flange nuts in V4A

- 111010-200** Fastening kit for corrugated roofs 10x200 M10x200 mm
- 111012-200** Fastening kit for corrugated roofs 12x200 M12x200 mm
- 111012-300** Fastening kit for corrugated roofs 12x300 M12x300 mm

Fastening kit for corrugated roofs incl. mounting plate, hanger bolt with vulcanized EPDM-seal (UV-resistant) and 3 flange nuts in V4A

111210-200 Twin fastening kit for corrugated roofs 10x200 M10x200 mm

111212-200 Twin-fastening kit for corrugated roofs 12x200 M12x200 mm

111212-300 Twin fastening kit for corrugated roofs 12x300 M12x300 mm

Twin fastening kit for corrugated roofs incl. mounting plate, 2 hanger bolts with vulcanized EPDM-seals (UV-resistant) and 6 flange nuts, suitable for fibre cement plates or "Berliner Welle" 133 / 177 mm

119002-000 Mounting plate for hanger bolt M10 / M12

for hanger bolts M10 / M12, loose, aluminium
120x60x6 mm

119003-000 Dual mounting plate with hanger bolts M10 / M12

for hanger bolts M10 / M12, loose, aluminium
Extra stable design

119014-001 Hat rail 50mm long d11 d11 d11

for hanger bolts M10 (middle hole), loose, aluminium
middle hole: 11 mm, outer hole: 11 mm

119014-000 Hat rail 50mm long d11 d13 d11

for hanger bolts M12 (middle hole), loose, aluminium
middle hole: 13 mm, outer hole: 11 mm

119001-000 KlickTop attachment for hanger bolt

for hanger bolts M10 / M12, loose, aluminium

973000-002 EPDM seal for hanger bolt M10 / M12

EPDM, UV-resistant

Area of application

Fastening of solar and photovoltaic plants to the substructure of corrugated eternit roofs or trapezoidal sheet metal roofs.

Technical data

Material Bolts: Stainless steel 1.4301
Mounting plate / KlickTop attachment: Aluminium
Rubber seal: vulcanized EPDM-seal (UV-resistant)

with bolt, Klick inlay and square nut for Klick groove M8
for the mounting of profiles to the standing seam clamps using
KlickTop

129063-000 Rapid cross connector

Complete pre-assembled for click-groove M8
for cross rail systems

➔ **Product Sheet Rapid cross connector**

Trapezoidal clamp Fix 2000

The universal trapezoidal roof fastener
for steel sheets breadth min. 0.55 mm and aluminium sheets breadth min. 0.8 mm:
Also for steel and alu sheets breadth min. 0.5 on request;
Customized production (measurement checklist is available for download)!
Instructions for use should be carefully observed!

113002-000 Fix2000 KlickTop

incl. 4 self-tapping screws

113002-001 Fix2000 KlickTop with seal

Design with glued-in EPDM rubber seal
(Manufacturer recommendation)

113001-000 Fix2000 Standard

incl. 4 self-tapping screws and 1 screw kit M10

113001-001 Fix2000 Standard with seal

Design with glued-in EPDM rubber seal
(Manufacturer recommendation)

973000-014 EPDM seal for self-mounted assembly

(10 m - Roll, 48 mm wide)

119009-000 Gauging tool for Fix2000

(for measuring out trapezoidal sheet dimensions)

Corrugated roof fastening elements

System VarioFix

The universal fixation for trapezoidal sheet metal roofs for steel- and alu sheeting of breadth min. 0.5 mm; Please read instructions for use carefully!

113009-100 SingleFix-V Solo pair kit

(2 x SingleFix-V Solo, 4 self-tapping screws)
For use with e.g. assembly rail Solo

113009-200 SingleFix-V Solo mounting kit

(2 x SingleFix-V Solo, 4 self-tapping screws)
Profile piece Solo 450 mm

113009-101 SingleFix-V Profi pair kit

(2 x SingleFix-V Solo, 4 self-tapping screws)
For use with e.g. mounting rail Profi

113009-103 SingleFix 20 pair Set

(2 x SingleFix 20, 4 self-tapping screws)
With particularly low corrugation crests, min. 20 mm!
For use with e.g. mounting rail Solo

113009-202 SingleFix 20 mounting kit

(2 x SingleFix 20, 4 self-tapping screws,
Rail piece Solo 450 mm)
With particularly low corrugation crests, min. 20mm!

113011-100 SingleFix-HU

(2 x SingleFix-V Solo, 4 self-tapping screws,
SingleFix-HU rail)

119015-002 Punched mounting tape 17x0.8 Hole 5.2-5.3 mm - 50 m

For fastening individual clamps as a potential connection
or for binding the string cabling if mounting rails
cannot be deployed

Fastening component FixPlan

The alternative for smooth sheet metal roofs, i.e. with no standing seam to provide a base for fastening (e.g. titanium zinc metal roofs).

114001-001 FixPlan 12x200 KlickTop with hanger bolt 12x200

114002-001 FixPlan 12x200 KlickTop with hanger bolt 12x300

114001-000 FixPlan 12x200 with hanger bolt 12x200

114002-000 FixPlan 12x300 with hanger bolt 12x300

114003-000 FixPlan sealing mat

114004-000 Bituplan additional seal for FixPlan

For mounting on bitumen roof coverings

Area of application

For fastening solar plants and PV-plants to sheet metal- and bitumen roofs.

Important information on structural safety

- A sufficient holding force of the metal sheet to the substructure is prerequisite when mounting an assembly on the roof cladding. Please note that this verification must be provided by the customer!
- Sheet metal is particularly prone to stress in elevated plants. Please ensure a sufficient number of fastening points and provide proof of the holding capacity of the roof covering.
- The verified holding force of the standing seam clamp on the roof can be taken from the respective system structural analysis.
- Take into account the additional stress at roof edges and in the corner zones, or avoid these areas altogether when planning the plant assembly.
- The self-weight of the PV plant must be added to the snow load in order to calculate the maximal load incurred on the roof covering.

Technical data

Material	Bolts: Stainless steel 1.4301 Rails: EN AW 6063 T66 / AlMgSi0.5 Sheet metal components: Stainless steel 1.4302
Statik	Structural analysis in accordance with current national standards (in Germany DIN1055 and EC1). Structural analysis appendices for dimensioning the number of required fastening points, based on structural calculations with evidence drawn from tensile tests. Please ensure you observe the structural analysis information for each case. Verification for adhesive forces of a roof to the substructure is not included in any of the general structural analysis appendices!

System prices can be obtained quickly and easily with our Autokalkulator.

FixE and FixT Overview

The innovative fastening solution with steel and wooden purlins.
Order to be submitted by means of checklist FixE / FixT only

111006-000 FixE Gr.1 Single fastening kit

111007-000 FixE Gr.2 Twin fastening kit, plate

For distances between crests of

- of 133 and 177 mm, +/- 10 mm

Slotted holes allow for adjustment

Please note!
 Twin fastening kit for corrugated roofs: Item numbers and info on Page 15

111008-000 FixE Gr.3 Twin fastening kit, Top-hat profile

Manufacture in accordance with check lists

**113004-000 FixT Gr.1 Single fastening kit****113005-000 FixT Gr.2 Twin fastening kit**

For distance between crests of

- up to 250 mm
- up to hanger bolt size M10

113006-000 FixT Gr.3 Twin fastening kit

For distance between crests of

- more than 250 mm

FixE and FixT

Fastening elements

113007-000 FixT Gr.4 Quadruple fastening kit

For distance between crests of

- up to 250 mm

113008-000 FixT Gr.5 Quadruple fastening kit

For distance between crests of

- more than 250 mm

Area of application

Elevation systems such as CompactVario and CompactGrid

Important information on structural safety

Support elements are adapted to the roof covering in accordance with the checklist; the corresponding screws are selected and the distance tube length is determined. The structural dimensioning of the complete construction (roof connections, support plates, elevation) is carried out using a convenient structural analysis program.

Technical data

Material	Bolts: Quality steel 1.4301, 8 mm for steel purlins, hanger-bolts M10 or M12 for wooden purlins. Distance tubes: Alu, diam. 20 mm / 16 mm (only with steel purlins): Concentric EPDM-seal, UV-resistant in steel purlin assemblies. Custom-designed sealing top or rubber for corrugated roofs with wooden purlin assemblies. Sealing collar, EPDM rubber-moulded part, UV-resistant Supporting elements: Top-hat profiles: Aluminium; Fastening bracket VA (FixE1) or mounting plate aluminium (FixE2)
Statik	Structural analysis in accordance with current national standards (in Germany DIN1055 and EC1). a) Roof-parallel mounting: Tables containing the number of fastening points b) Elevations. Structural analysis project planning program CompactVario

129009-006 6 m

Accessories for profile series 05:

129010-008 KlickIn click component for nut M8

for simplified insertion of the M8 square nut at any desired point of the M8 KlickIn groove

129012-008 Proklip-S rectangular cable clip channel M8

Rectangular, for insertion into the Klickin channel M8 to optimize cable routing

129012-010 Proklip2000-B rounded cable clip channel M10

Rounded, for insertion into the M10 screwing channel to optimize cable routing

Profile series 05

Standard profiles and accessories

129065-008 Proklip-Multi 8

Rectangular, for insertion into the screw channel M8 to optimize cable routing

129065-010 Proklip-Multi 10

Rectangular, for insertion into the M10 screw channel to optimize cable routing

129005-000 Proklip-C cable clip for Solo05 and Profi05

Rectangular for insertion into the upper and lower screw channel for Solo05 and Profi05

135003-000 Lightning protection clamp for 8 mm

Alu completely pre-assembled (for wire diameter 8 mm)

Area of application

Parts from all Schletter rail groups can be combined for application on pitched or flat roofs, and in open areas as well as with a variety of special systems. Minimize raw materials requirements by selecting a rail from our wide range of products to best fit your custom application!

Technical data

Material Bolts: Quality steel 1.4301; rails: EN AW 6063 T66 / AlMgSi0.5
Sheet metal components: Stainless steel 1.4301

Statics Structural analysis in accordance with current national standards (in Germany DIN1055 and EC1). Appendices for dimensioning the number of required fastening points, based on structural analysis. Please ensure you observe the structural analysis information for each case. Verification for adhesive forces of a roof to the substructure is not included in any of the general structural analysis appendices!

System prices can be obtained quickly and easily with our Autokalkulator. Please refer to our website: www.schletter.eu

Inlay System Overview

The Schletter inlay system for roofs and open areas
 ➔ please also see the structural analysis charts for cross beams

Important information

Modules with certification for a bespoke frame can be mounted in inlay systems, in so far as the certification is available. The module frame must be designed to withstand larger loads, as the unsupported span is much greater if the modules are mounted vertically.

Black anodized on request!

Flat roof systems

162001-000 Sol Cube kit

Compatible with all designs, for loading with gravel or with concrete slabs., incl. screw kit for fastening

162001-001 Sol Cube (no accessories)

Special supports

Facade support with 15, 20, 25 [...5°-increments], 70, 75 degrees

To select the support angle (angle a), please specify the module inclination relative to the horizontal - aluminium, screwed

Facade support

		Module height	a	b
156001-100	Light 10	approx. 0.8-1.0 kg	820 mm	840 mm
156001-130	Light 13	approx. 1.0-1.3 kg	1050 mm	1050 mm
156001-160	Light 16	approx. 1.3-1.6 m	1285 mm	1260 mm
156002-160	Profi 16	approx. 1.3-1.6 m	1285 mm	1260 mm

Vegetated-roof support for modules of up to 1.6 m at 15, 20, 25, 30 degrees

Please state the desired inclination!

Aluminum, bolted;

approx. 0.4 m ground clearance

Length of the module angle: approx. 1.5 m

compatible accessories: as for support Profi

152001-000 Vegetated-roof support for modules of up to 1.6 m

154001-000 Vegetated roof support for CompactVario kit (incl. fittings kits)

153001-000 Flat roof or bottom support VarioTop (10 to 60 degrees)

The variable support with summer and winter settings!

10% more annual yield with one-off time re-set

in spring and in autumn!

AluGrid (project-specific)

Material and tool-optimized system by which modules are fastened to flat roofs in closed rows with a fixed elevation angle of 15 degrees or, alternatively, 10 degrees with minimal ballast.

➔ **Prospekt AluGrid** (incl. component overview)

AluLight kit

The basic 12-degree elevation for flat roof. Only possible if standard module clamps are used. Concrete slabs are used for loading.

Area of application

Parts from all Schletter profile groups can be combined for application on pitched or flat roofs, and in open areas as well as with a variety of special systems. Minimize raw materials requirements by selecting a profile from our wide range of products to best fit your custom application!

Technical data

Material Bolts: Quality steel 1.4301; profiles: EN AW 6063 T66 / AlMgSi0.7
Sheet metal components: Stainless steel 1.4301

Statics Structural analysis in accordance with current national standards (in Germany DIN1055 and EC1). Appendices for dimensioning the number of required fastening points, based on structural analysis. Please ensure you observe the structural analysis information for each case. Verification for adhesive forces of a roof to the substructure is not included in any of the general structural analysis appendices!

System prices can be obtained quickly and easily with our Autokalkulator. Please refer to our website: www.schletter.eu

LARGE PROJECTS

SystemFS, PvMax3, Park@Sol, IsoTop

Large projects

Large-scale projects

SystemFS, PvMax3, Park@Sol, IsoTop

Large projects are individually calculated and are compiled in-house prior to dispatch.

We are looking forward to your inquiry!

Open area - SystemFS, PvMax3

Each FS open area system is custom-designed for assembly in its designated location. In addition to the pile-driving technology of the FS system, a concrete foundation system is also available with the PvMax3.

➔ [Product /mounting sheets FS/PvMax3](#)

FS system

PvMax3

Carports - Park@Sol

Solar carports provide a welcome supplement of power for wide-area utilization of photovoltaic energy, particularly as carport roof surfaces are generally granted maximum compensation, according to the Renewable Energy Sources Act!

➔ [Product sheet Park@Sol](#)

Industrial Foil Roof – IsoTop

The substructure of an industrial foil roof generally has very large distances between girders. The IsoTop system with support distances of up to 10m allows for project-specific solutions requiring no additional loading of the roof covering.

Innovations 2013

Enhanced unit assembly system

Wide range of products

We are continually improving and enhancing our product range in order to meet individual requirements. Greater load-bearing capacity, conformity with further models of tile and optimized mounting capability are the focal objectives when enhancing our fasteners.

Alu-Tile

The robust substitute tile Alu-Tile can be mounted easily and quickly and is available for any type of tiled roof.

The newly developed system hook facilitates both horizontal and vertical rack arrangement.

Cross connector Rapid

Simple and uncomplicated mounting - the KlickTop cross connector is assembled and mounted easily. And now Schletter has developed this system even further. The result is the Rapid cross connector. As with its predecessor, the fastener can be

deployed from above into any Schletter rail with a Klick groove. Where the KlickTop solution comprises two components, its successor has only one. The cross connector can therefore be delivered in large volumes.

Rapid 2L kit

Certain roof systems, found primarily in the Benelux countries, do not use the type of wooden rafters and purlins commonly found elsewhere in roof constructions. Self-supporting, insulating roofing elements are laid vertically instead to create a roofing framework. These elements consist mainly of thick-walled insulation held in place at the edges by wooden rafters. The conventional type of roof hook cannot be used with these roof systems as these cannot be fastened to the narrow edge-rafters.

Kit systems comprising roof hooks hung from a tile or batten provide no alternative in such cases as these roof systems are not able to withstand load on the tiles. The new Rapid 2L roof hook system solves this problem in that it diverts the forces into the vertical wooden rafters via a specifically designed mounting kit.

SlatePlan

SlatePlan was designed for roofs with a shingle covering, e.g. of bitumen, eternit or slate. These are fastened using our proven hanger-bolt systems. SlatePlan is incorporated into an existing shingle roof system in order to seal holes drilled to accommodate the hanger bolts. A sealing ring applied to the underside also prevents penetration of water from the sides.

SlatePlan is anchored to the bearing wood substructure together with the hanger bolt. Optimal sealing properties are thus achieved with minimal assembly effort.
