Data sheet

HIGH QUALITY ENGINEERING BY SOLARWORLD

More than 40 years of technology expertise, ongoing innovation and continuous optimization create the foundation for the performance of Solarworld's high-quality modules. All production steps, from silicon to module, are established at our production sites, ensuring the highest quality for our customers every step of the way. Our modules are extremely flexible when it comes to their application and provide optimal solutions for installation and non-stop performance – worldwide.

- » Elegant design for aesthetic roof integration – entirely black solar module, from the cells and the frame to the module corners
- » Especially stable, despite its low weight mechanical resilience of up to 8.5 kN/m²
- » Tested in extreme weather conditions – resistance to salt spray, frost and hail-proof, resistance to ammonia, dust and sand
- » PID-resistant and proven hotspot guarantee
- » Highly-efficient cells (mono PERC) for the highest possible yields
- » Harmonized components such as mounting systems, connector cables, inverters and energy storage systems can be delivered as complete system
- » Patented drainage corners for optimized self-cleaning
- » Front glass with an anti-reflective coating
- » Long-term safety and guaranteed top performance – At least 97% of nominal power in the first year – 25-year linear performance warranty 20-year product warranty
